

Making Better Takeoffs and Landings

This 2-hour seminar will cover techniques and tips for improving takeoffs and landings in a variety of conditions. We will discuss some of the hazards and common errors that occur in these phases of flight and ways to mitigate risks and prevent errors. Topics will include: Stabilized approaches, Flight in the region of reversed command, Visual perceptions and illusions during the takeoff and landing phases, Performance planning and monitoring, What to do when things aren't going as expected, Decision-making, Specialized takeoffs and landings. Please Contact Colorado Flight Center for more information. 970-254-0444

Directions: From Horizon Drive follow the signs to General Aviation East and West Star FBO. Park in the West Star customer parking. Colorado Flight Center is located on the second floor of the 800 Hangar

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
